Dear Hiring Manager,

I am an experienced, creative, collaborative, team-oriented developer with a track record of award-winning projects in web development, marketing, design, and visual communications. I have extensive knowledge of front-end development and UI development best practices, utilizing Angular, TypeScript, JavaScript, and expert level css being the go-to for all complex css solutions on my current development team.

With 12+ years in web development, including an extensive design background, I bring innovative design and development solutions to address business challenges at a high level. I create dynamic, flexible, and responsive web applications that enhance and elevate the professional appearance of projects. I am confident that my combination of practical work experience and strong educational background has prepared me to make an immediate and meaningful contribution to your team. I understand the professionalism and communication skills required for long-term success in the software engineering field.

Sincerely,
David Manzer

DAVID MANZER

FRONT-END UI DEVELOPER / DESIGNER

SUMMARY

12 years of development experience with an extensive graphic design background. Proven track record in building accessible, high-quality UIs with a strong focus on CSS/SCSS, Angular (5+ years), and modern tools like Figma. Adept at leading design teams, mentoring junior developers, and thriving in fast-paced agile environments. Passionate about crafting clean, user-centric interfaces while continuously evolving skills through education and open-source contributions. Experienced in full-stack principles, accessibility standards, and delivering award-winning designs and development solutions.

PROFESSIONAL EXPERIENCE

Softrams | Sr. UI Developer | 8/2019 - present

As a Senior UI Developer for the MEARIS application system i.e., CMS (Centers for Medicare & Medicaid Services), I am responsible for upholding design integrity, ensuring seamless user experiences, and enhancing UI aesthetics and usability. I translate Figma designs into dynamic, responsive Angular UI components, utilizing Angular Material, Bootstrap 4, and SCSS to craft cohesive and reusable interfaces. In collaboration with UX designers and accessibility testers, I lead efforts to build accessible, 508-compliant UIs, providing mentorship to developers on CSS/SCSS styling and accessibility best practices. Operating within an agile environment, I work closely with the development team, participate in pair programming, and contribute to a consistent design system by developing a UI style guide. I actively engage in knowledge sharing, leading development talks to foster team growth, and ensure the project adheres to the highest standards of usability and design across the MEARIS platform. Additionally, I leverage tools such as git, AWS, and VSCode to streamline development, integrating Node.js APIs and DynamoDB to support project functionality.

Kaseya | Front End Web Developer | 6/2016 - 8/2019

On a daily basis, I was responsible for building features, maintaining, and enhancing a portfolio of sites within the Kaseya brand. My workflow involved utilizing Adobe CC tools such as Photoshop and Illustrator for design tasks. In my development environment, I rely on Atom and iTerm for coding, Git for version control, and various CMS systems including Drupal, Wordpress, and Jekyll for content management. Proficient in HTML5, CSS3, and JavaScript, with additional experience in PHP for minor tasks. I leverage technologies such as Bootstrap 4, Flexbox, and SASS to streamline development processes, along with tools like Gulp for task automation. Database management is facilitated through MySQL, while npm and ACF aid in plugin integration and management. Furthermore, I implemented tracking and analytics solutions using Google Tag Manager to monitor site performance and user behavior.

WorldatWork | Front End Web Developer/Designer | 9/2013 – 6/2016

In this role, I was responsible for web design, front-end development, and the maintenance of web pages within an extensive structure comprising over 40,000 pages. I relied on a range of technologies on a daily basis, including Adobe CS6 tools such as Dreamweaver, Photoshop, and Illustrator. Additionally, I utilized Office suite applications such as Word, Excel, and Outlook within a Mac environment. My proficiency extended to programming languages such as XHTML, HTML5, CSS3, jQuery, and JavaScript, with version control managed through Git in a .jsp environment. I also gained experience in secondary technologies including SASS, LESS, SVG, Java, XML, Ajax, JSON, and terminal commands. Supplementary software used in my workflow included atom.io, Brackets, Flash, Cornerstone SVN, Confluence, and JIRA for effective project management and collaboration.

Anderson Advertising, Scottsdale, AZ | Web Developer/Designer | 4/2013 – 9/2013

Angel MedFlight, Scottsdale, AZ | Web Designer/SEO Specialist | 10/2012 – 4/2013

TECHNICAL PROFICIENCY

DESIGN:

Photoshop, Illustrator, Figma,
*all areas of Graphic Design
